I turn to another topic and for this I will give the grids that I did not have time to give for testing.
Countries: Europe, Argentina, USA and some Asia.
Access rights: local user of the domain and there are local admins (there are a couple with DA).
Valid access 99%.
I SELL ACCESS ONLY IN A PACK! WILL NOT SELL SEPARATELY, DO NOT WRITE.
There are practically no gos, mostly good companies.
I repeat that the accesses should have been given for testing, but I never gave them away.

On the guarantor of the exp - I agree.

SS7

SS7 gateways with SSH SIP and web panel

We sell each for 10k$

can i use it for any number/country ?
- it works for any call or sms worldwide and carrier doesn't matter because of roaming

what is required?
- you just need a phone number to start your work

We have a limited amount of gateways for now the count is **6**

The sale is unique We don't resold the same gateway , so it will be the exclusive access

if you are serious buyer we could negotiate in price

we hack different brands of gateways so when we have new ones fresh one could be different from last ones

Note : We Don't provide any free test , Support
You will get only Gateway access as Admin + official user manual with documentation of 330+ pages of pdf

we don't give any support for intercept and other process we've tested it with a telecom sys admin and its long and complex process to done it

only a few researchers or APT groups know how it works and who works in telecom as sys admin
so buy this gateway with all point of view

I would like to tell time wasters that if you Don't have funds or not interested in this then stay away from us

I am selling method in 1 hand with which you can make Mach-O file to be executable on any machine across all versions of MacOS without the need to CodeSign the binary.

This method effectively removes the "com.apple.quarantine" attribute from the binary in order to execute the code on any machine outside your own.
This method only applies for MacOS, not for IOS.
This method also allows you to change the Icon of your payload to any one you wish.

Escrow ONLY - so you can see the method working before garant releases funds

The price is negotiable. Conditionally let it be 1k$

Explain in more detail - you need to extract the metamask backup file from iCloud, do I understand correctly? If yes, then multiply the price by 10 and knock me in the PM

Everyone needs a mission that they
advance anew every day. Ours is simple,
yet effective: We would like to inspire our
guests on all levels, and turn every hotel
into a hospitable place where everyone
can feel welcome while preserving its own
individuality and personality. Our target is
giving people a temporary home, going
the small but important steps every day
that makes the difference and lets us be
unmistakable and unique. This is what
drives us – in all that we do.
Every personal interview, every friendly
gesture, every small service must be
measured by: Does the guest feel
welcome? Is the guest competently
informed? Unique? Valued? Are we able
to not only meet, but exceed
expectations? No matter how perfect
guest service may be: It is worthless for
us when it doesn't come from the heart.

I currently have access in many large corporations with revenues ranging from 50 million to multi billion dollar companies. I'm looking to partner with some skilled pen testers who are competent in privilege escalation in many different OS's and comfortable starting from varying initial access points.

I only work on a % basis. Please don't ask for price for a network. To start communications send me your TOX or jabber.

Hello,

This is one of hundred on servers in backup company who provided backup services for web-hosting company and European's companies.

We are selling the access to it and you can from this server to access other of hundred of backup servers and capture, download all BIG companies database and files.

Server Space: 25 TB. (and you also able to use the whole space! with no penny cent more!)
Server companies hosted: 60
Server kernel 2015
Customers Type: web-hosting providers, US and European companies.

You can easily expand your attack to other outdated server internally; more details in PM.

Price is 5K XMR only.
guaranteed no problem.
